

Industry Leadership Through Excellence **Sarıkaya,**

Supplying premium fresh produce to more than 30 countries globally. Our advanced technology and complete supply chain traceability ensure consistently reliable, top-quality products throughout the entire journey from field to market.

We deliver fresh citrus and premium fruit varieties

through an uninterrupted

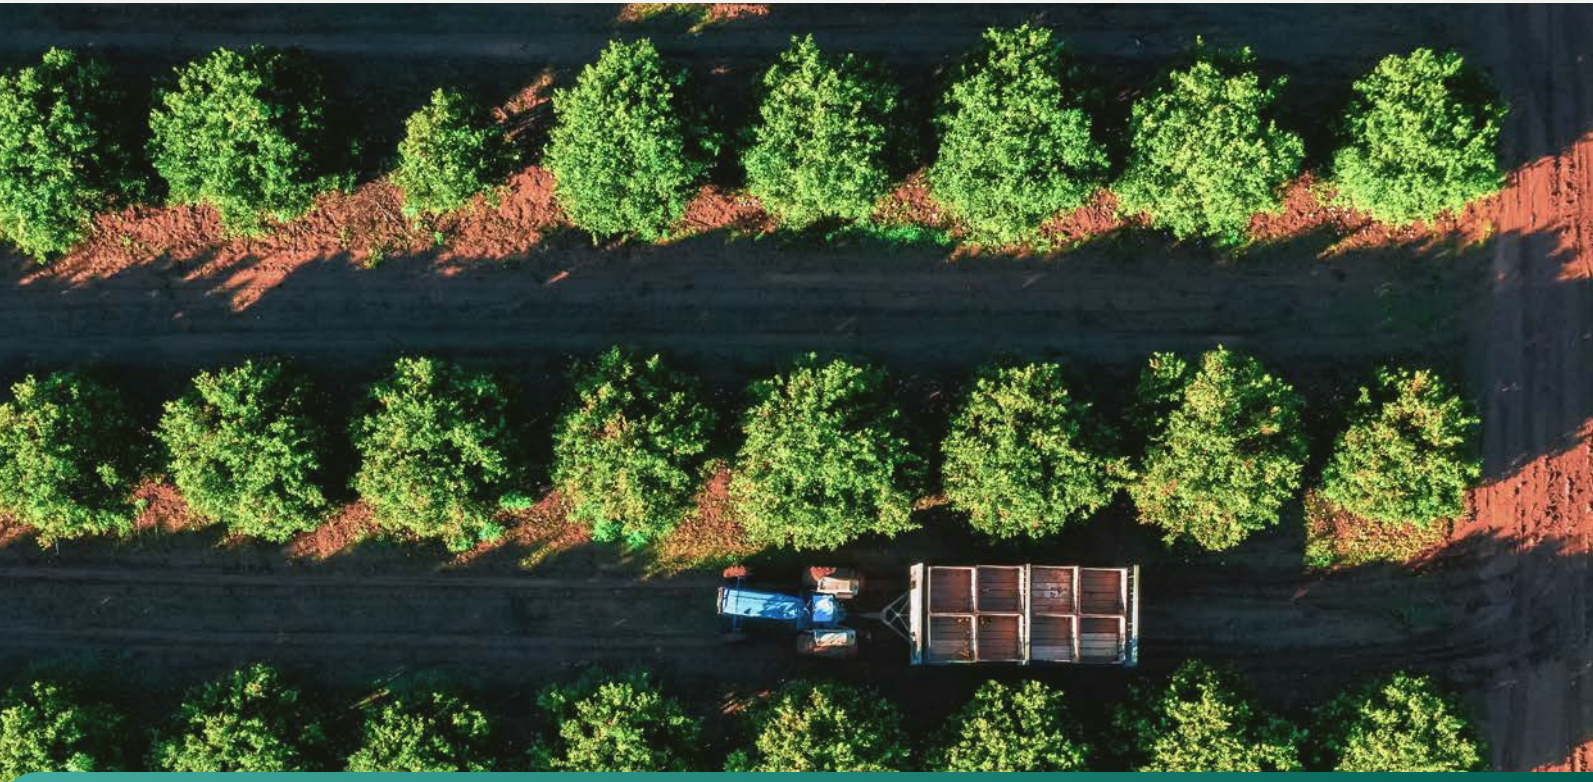

cold chain to

global markets.

Founded in 1985, Sarıkaya has established itself as a leading service provider in Turkey's most productive agricultural regions through strategic positioning. Our main facility, located in the Mersin-Tarsus region known as the heart of the Mediterranean Citrus Belt, serves as the central hub for premium citrus sourcing. Meanwhile, our production facility in Manisa-Alaşehir connects us to the valuable vineyards of the Aegean Region and nearby fruit gardens. This strategic approach enables us to offer rapid access to diverse product varieties across both regions, while providing our customers with maximum efficiency in fresh produce sourcing.

We differentiate ourselves in the industry through advanced technology investments and expert teams. Our food engineers, quality engineers, and technical specialists work collaboratively to maintain the highest quality standards. Our artificial intelligence-powered visual inspection technologies, state-of-the-art machinery, and SSCC traceability system integration ensure complete excellence throughout production. We provide seamless traceability from field to delivery, particularly meeting supermarket chains' EDI (Electronic Data Interchange) integration requirements and offering comprehensive supply chain visibility through RFID technology.

STATE OF THE ART PRODUCTION FACILITIES

Our company combines modern technology with traditional agriculture, exporting to over 30 countries worldwide.

Our two facilities in Mersin and Manisa feature advanced machinery and expert teams across 36,000 m² of developed space, with annual processing capacity of 100,000 tons of citrus, 20,000 tons of fresh produce, and 5,000 tons of vegetable processing.

From the Mediterranean's premium citrus varieties to the Aegean's renowned grapes and fresh produce, we deliver an extensive product range to customers across four continents through our uninterrupted cold chain logistics.
